

Paramount Industries Adopts Windform XT

Windform XT proves ideal for national defense and aerospace applications.

by DE Editors | Published September 24, 2008

CRP Technology's (Modena, Italy) Windform XT, the carbon-fiber filled material, has been chosen by Paramount Industries, (Langhorne, PA) for use on its machines and in aerospace and national defense applications.

Paramount offers product development services that include product design and engineering, rapid prototyping, rapid tool and direct digital rapid manufacturing technology which produces custom parts directly from digital input. The demand for materials with great strength and durability in both the aerospace and national defense sectors make Windform XT an ideal choice for the company.
